

Zero injuries.
Zero fatalities.
Zero suffering.

Preventing injuries in the workplace means protecting your company's most valuable resource – your workers.

Succeeding in prevention means:

- Positive safety culture
- Continued quality of life for workers
- Increased employee retention
- Reduced business costs
 - Lower insurance premiums
 - Consistent productivity levels
 - Reduced damage to equipment and product

Become a Safety Champion!

WorkSafe Saskatchewan Safe Worker and Safe Employer Awards are presented annually to a Saskatchewan worker and employer who exemplify workplace safety.

See www.worksafesask.ca for more information.

Classroom Training

- Computer Workstation Assessment Training (CWAT) – a six-hour course on how to apply and assess ergonomic principles to set up computer workstations for ergonomic fit
- Back Talk – this four-hour course outlines ergonomics of safe lifting, safety tips, hazard assessment and control to prevent back injuries
- Understanding the WCB – a one-day course on injury prevention and WCB processes, including registering your business, filing a claim, managing a claim, and effective return-to-work management
- Effective Return to Work – a two-day course on how to set up, implement and administer a return-to-work program within your organization
- Effective Measurement for Safety – a two-day course with customizable tools to assist employers in understanding the benefits of keeping safety statistics, applicable legislation, why, what and where to find the information, data management, training, communication and continuous improvement.

Classroom training courses are available for onsite delivery at an employer's worksite. For more information, contact prevention@wcbssask.com.

Online Training

- Workplace Hazardous Materials Information System (WHMIS) 1988 or 2015 – covers WHMIS education
- Workplace Inspection Training – covers purpose, planning, conducting and responding to workplace inspections and the role of the Occupational Health Committee (OHC) in conducting workplace inspections
- Workplace Incident Investigation – covers how to conduct workplace investigations and the role of the OHC in investigating workplace incidents and dangerous occurrences
- Young Worker Readiness Certificate – all 14 and 15 year-old workers in Saskatchewan need a Young Worker Readiness Certificate of Completion to be able to work. This online course requires completion of three modules and a test, upon which a Certificate of Completion is issued.
- Psychological Health and Safety – creating a better awareness and understanding of the issues related to psychological health and safety in the workplace

Occupational Health Committee (OHC) Classroom Training

- Level 1 OHC Training – a two-day course for OHC co-chairs, OHC members and safety representatives about their legislative requirements
- Level 2 OHC Training – a two-day course for OHC co-chairs, OHC members and safety representatives about their role in conducting inspections and incident investigations
- Supervision and Safety Training – a one-day course for supervisors about their role in workplace health and safety

Occupational Health and Safety Train the Trainer (TTT) – certifies participants to deliver OHC training. Participants must have completed applicable OHC training as a prerequisite.

- OHC 1 TTT – a two-day course in how to deliver Level 1 OHC training
- OHC 2 TTT – a two-day course in how to deliver Level 2 OHC training
- Supervision and Safety TTT – a two-day course in how to deliver Supervision and Safety training

To view the schedule for upcoming training opportunities and to register for specific course dates, please visit www.worksafesask.ca.
